Miami, FL | [305.859.1695](tel:305.859.1695) | sujith.varug@gmail.com

Full Stack Software Engineer focused on system architecture, workflow automation, and AI-powered workflow tools. Experienced delivering scalable SaaS solutions, multi-tenant platforms, and cloud-native services that support tens of thousands of users.

EXPERIENCE

FULL STACK SOFTWARE ENGINEER

AllClear.ai | Davie, FL | October 2025 – April 2026

- Delivered production features for a **multi-tenant SaaS** platform powering **Debt.com** and other enterprise partners in the consumer fintech space, serving **50,000+ monthly users**, using React, TypeScript, NestJS, and Firebase.
- Built the platform's **multi-tenant Firestore architecture**, introducing a multi-database structure that isolates data per organization while enabling scalable configuration-driven workflows across enterprise partners.
- Led design and development of a visual decision rules engine** and **LLM-powered chatbot** using **OpenAI**, enabling non-technical users to build visual workflows and create complex debt-relief eligibility rules without engineering support; now adopted by Debt.com and enterprise partners to evaluate customer program eligibility
- Designed and implemented **serverless backend services** on Google Cloud Platform, processing thousands of daily financial transactions with **sub-second p95 latency** using Cloud Functions and Firestore.
- Managed redesign** of Debt.com's customer offer confirmation workflow, replacing fragmented UI screens with **reusable React components** that improved maintainability and eliminated duplicated rendering logic.
- Designed and built **electronic signature integration** for customer agreements using Server-Sent Events to track document readiness and signature status, enabling **3,000+ signed customer agreements monthly** across partner onboarding flows.
- Implemented **structured logging** and **request traceability** via **Google Cloud Logging**, reducing production incidents and debugging time by **50%** across the stack.

FULL STACK SOFTWARE ENGINEER

SGS Properties, Inc. | Hollywood, FL | December 2022 – September 2025

- Led development of a proprietary property management platform supporting **100+ rental units**, collaborating directly with investors to translate business objectives into scalable services and reducing manual management workload by **40%** through automation and structured onboarding.
- Integrated REST APIs for real-time property listings and rental market data, along with **Stripe Payments API** for secure online payments resulting in increased tenant and management satisfaction and a **150% increase in lease renewal rates**.
- Designed backend architecture using Node.js, MongoDB, AWS S3, implementing OAuth 2.0, Firebase Auth, and JSON Web Tokens (JWT) for secure authentication and role-based access control while supporting stable, uninterrupted operations.

SOFTWARE ENGINEER INTERN

Florida International University Dept. of Engineering & Computing | Miami, FL | January 2022 – December 2022

- Developed and delivered a full-stack research application from concept to deployment while leading an **Agile** engineering team, managing **sprint planning**, and participating in **code reviews** while maintaining project timelines and delivery milestones.

PROJECTS

AUTHENTIME | 2024 | TypeScript, React Native, Next.js, Expo, OpenAI | [App Store Link](#)

- Developed an AI-powered watch authentication platform that analyzes user-submitted images and generates structured authenticity reports using OpenAI vision models; 500+ App Store downloads and 2,000+ authenticity reports generated.
- Designed cross-platform mobile and web applications with subscription billing using RevenueCat, cloud image processing, and automated report generation workflows.

MEDSCOPE | 2023 | React, Node.js, OpenAI | [Web Demo](#)

- Built a web and mobile application enabling both healthcare professionals and patients to search medical reference materials, receive AI-assisted health assessments, and explore potential conditions based on reported symptoms.
- Developed conversational search and document analysis that reduced time spent locating relevant clinical information.

TECHNICAL SKILLS

Core Technologies

React, React Native, Next.js, TypeScript, Node.js, NestJS, GraphQL, Jest, Cypress

Data & Cloud

PostgreSQL, Mongo, Firestore, Redis, AWS, Google Cloud Platform, Docker, GitHub Actions, CI/CD

AI & Tooling

OpenAI API, Anthropic API, Retrieval-Augmented Generation (RAG), LLM Workflow, Jira, Git, Figma

EDUCATION

BACHELOR OF COMPUTER SCIENCE

Florida International University | December 2022

CERTIFICATIONS

COMPTIA A+ | August 2024

META FRONT END DEVELOPER CERTIFICATE | January 2024
