Miami, FL | [305.859.1695](tel:305.859.1695)

Full Stack Engineer with five years of experience building production SaaS applications across the full software development lifecycle. Deep expertise in TypeScript and modern development, including cloud-based services and microservice architectures, with experience leveraging AI throughout the workflow to accelerate delivery and maximize productivity. Proven ability to align technical solutions with business objectives to deliver reliable production software in fast-moving team environments.

EXPERIENCE

FULL STACK SOFTWARE ENGINEER

AllClear AI | Davie, FL | October 2025 – April 2026

- Owned delivery of production features for a **multi-tenant SaaS** platform serving **50,000+ monthly** users across **Debt.com** and other enterprise partners in the consumer fintech space.
- Architected a visual decision rules engine and OpenAI-powered chatbot enabling non-technical users to build and deploy debt-relief eligibility workflows without engineering support. Adopted by Debt.com and enterprise partners.
- Designed **multi-tenant Firestore architecture** with separate databases per organization for strict data isolation, enabling scalable and configuration-driven workflows onboarded per partner without code changes.
- Re-engineered Debt.com's customer offer confirmation workflow into **reusable React components**, consolidating fragmented screens and eliminating duplicate UI logic
- Designed an **electronic signature integration** that ingested DocuSign webhooks and streamed document and signature status to clients via Server-Sent Events, supporting **3,000+ signed customer agreements monthly**.
- Built **serverless backend services** on GCP **Cloud Functions** for eligibility and offer events, implementing idempotent processing, retry handling, structured logging, and correlation IDs for end-to-end tracing in **Google Cloud Logging**.

FULL STACK SOFTWARE ENGINEER

SGS Properties, Inc. | Hollywood, FL | December 2022 – September 2025

- Built a proprietary property management platform supporting **100+ rental units**, automating tenant onboarding, lease tracking, document storage, and internal management workflows.
- Integrated third-party APIs for real-time property listings, rental market data, and **Stripe payments**, improving tenant self-service and streamlining rent collection.
- Automated lease and tenant lifecycle workflows, replacing manual property-management processes with event-driven notifications and centralized document tracking.
- Designed Node.js/MongoDB backend architecture with **AWS S3** storage, using Firebase Auth for identity and **JSON Web Tokens (JWT)** for secure role-based access control.

SOFTWARE ENGINEER INTERN

Florida International University Dept. of Engineering & Computing | Miami, FL | January 2022 – December 2022

- Developed and deployed a full-stack research application from concept to launch while leading an **Agile** student engineering team through **sprint planning**, code reviews, and delivery milestones.

PROJECTS

AUTHENTIME | 2024 | TypeScript, React Native, Next.js, Expo, OpenAI | [App Store Link](#)

- Built and launched an AI-powered image analysis app that uses **OpenAI vision models** to evaluate user-submitted watch photos and generate structured authenticity reports.
- Developed cross-platform mobile and web experiences with subscription billing, cloud image processing, and automated report generation; reached **500+ App Store downloads** and **2,000+ reports generated**.

MEDSCOPE | 2023 | React, Node.js, OpenAI | [Web Demo](#)

- Built a RAG-based medical information retrieval application that indexed medical reference materials and generated source-cited responses to natural-language queries.
- Implemented conversational document analysis features that helped users find relevant clinical information faster.

TECHNICAL SKILLS

Core Technologies

TypeScript, Node.js, React, React Native, Next.js, Express.js, NestJS, REST APIs, Jest, Cypress

Data & Cloud

PostgreSQL, MongoDB, Firestore, Redis, AWS, GCP, Docker, GitHub Actions, CI/CD

AI & Tooling

OpenAI API, Anthropic API, RAG, LLM Workflows, Prompt Engineering, Jira, Git, Figma

EDUCATION

BACHELOR OF COMPUTER SCIENCE

Florida International University | December 2022

CERTIFICATIONS

COMPTIA A+ | August 2024

META FRONT END DEVELOPER CERTIFICATE | January 2024
